

ZHALAE DANESHVARI

CORNELL UNIVERSITY

zhalaе15@gmail.com | (862) 207-9173 | Boonton, NJ 07005 | [Website](#) | [LinkedIn](#) | [GitHub](#)

SKILLS

AI & Data

Python, SQL, Agentic AI, LLMs, RAG, ML
Predictive & Similarity Modeling, R, BigQuery

Health Tech & Life Sciences

Medical XR, Clinical Research, UAT, Digital
Biomarkers & Endpoints, Biosensors,
Pharmacovigilance, Cheminformatics

XR & Human Computer Interaction

Unity, Blender, C#, Meta Quest SDKs, Spatial
UI/UX Design, User Research, Usability
Testing, Figma, Wireframing & Prototyping

Cloud & Software Engineering

GCP, Vertex AI, Java, REST APIs, Docker,
PostgreSQL, MongoDB, React, AngularJS

Research & Analysis

Study Design, Experimental Design, Human-
Subjects Research, Literature Review,
Scientific Writing, Data Analysis & Statistics

PROJECTS

[PantryPal](#)

Personal

AI-powered PCOS meal planner
Local LLMs, Prompt Engineering, Vue.js

[Molecular Data Chatbot](#)

J&J

Pharmacovigilance ChatBot
Vertex AI ADK, GCP, Python, BigQuery

[SecondThought](#)

Cornell

AI-powered learning assistant
UX, Diary Study, Auto-biographical design

TEACHING ASSISTANT

INFO 5440 - App Design & Prototyping

Grad TA | Vue.js, LLM Integration

INFO 1300 - Intro Web Dev & Design

UG TA | HTML, CSS, JS, UX

INFO 2310- Interactive Web Dev

UG TA | React, MongoDB, REST

LEADERSHIP

President

May 2025 - May 2026

Persian Students Organization (PSO)
Led cultural programming and events for
200+ students and community members.

Vice President

Dec 2024 - Jan 2026

Women In Computing at Cornell (WICC)
Oversaw 50+ E-Board & Committee members,
driving branding and outreach efforts for
Cornell's largest women-in-tech organization.

EDUCATION

Master of Professional Studies, Information Science | Dec 2026

Cornell University, Bowers College of Computing & Information Science

Concentration in AI & PM | Research Focus: Medical XR | GPA: 4.075

Bachelor of Arts, Information Science | May 2026

Cornell University, College of Arts & Sciences

Concentration in Data Science & Interactive Technology | Minor: Near East Studies

GPA: 4.022 | Summa Cum Laude | Distinction In All Subjects

PROFESSIONAL EXPERIENCE

Digital Measures & Biosensors Intern

Johnson & Johnson Innovative Medicine

May 2026 - Aug 2026

- Spearheaded J&J's first feasibility evaluation of continuous sweat biosensor technology for an Atopic Dermatitis Phase 0 Immunology trial, informing study design, validating operational feasibility, and de-risking broader clinical adoption.
- Defined product strategy for VR-based endpoints in genetic vision-loss trials, translating stakeholder requirements into dev priorities, expanding trial capabilities.
- Conducted UAT of an actigraphy platform for nocturnal scratch, validating mobile-to-cloud data integrity and informing Phase 3-4 study protocol design.

Safety Data Science Intern

Johnson & Johnson Innovative Medicine

May 2025 - Aug 2025

- Led end-to-end discovery, architecture, and implementation of agentic AI platform using Vertex AI ADK, leveraging molecular fingerprints, pharmacovigilance data, to optimize drug discovery and safety evaluation.
- Developed hybrid cheminformatics and machine learning pipelines using Tanimoto fingerprint similarity, and predictive modeling to infer structure-toxicity relationships from SMILES representations.
- Built scalable cloud-native data infrastructure on GCP integrating ChEMBL, PubChem, FAERS, RDKit, BigQuery, and APIs, powering real-time molecular analytics.

Software Engineer Intern

International Flavors & Fragrances

June 2024 - Aug 2024

- Developed immersive VR applications in Unity, creating next-generation product visualization experiences enhancing customer engagement and marketing.
- Integrated AI chatbot solutions using local Llama models, democratizing access to workforce analytics through intelligent conversational interfaces.
- Architected AngularJS applications, PostgreSQL-backed analytics dashboards, and interactive data visualization tools, driving operational efficiency.

RESEARCH EXPERIENCE

Research Assistant

[Virtual Embodiment Lab \(VEL\) @ Cornell](#)

Dec 2024 - Present

- Conduct independent Medical XR research investigating VR-based sensory remapping as a potential therapeutic intervention for phantom limb pain and neuropathic pain, in collaboration with a clinician at Weill Cornell Medicine.
- Co-authored ACM CHI '27 submission examining how asymmetric transformations of avatar movement shape social behavior and perception in multi-user VR.

[Design + Augmented Intelligence Lab \(DAIL\) @ Cornell](#)

Aug 2024 - Jan 2026

- Contributed to manuscript development for VR-based environmental psychology and healthcare design research.
- Developed Python automation pipelines for behavioral data analysis.
- Managed participant recruitment and execution of VR user studies.
